# FRONT END DEVELOPER

## WORK EXPERIENCE

### REACT JS DEVELOPER

2/2023-Present

Cendrol Construction Contract Pvt Ltd

### Customer Relationship Management (CRM)

- Implemented essential functionalities, including pagination, CRUD (Create, Read, Update, Delete) operations, offering seamless data management capabilities within the CRM.
- Developed a Kanban board using library's like React beautiful dnd used in old version of CRM and dnd-kit/core used in latest version of CRM, which enhanced task visualization and workflow management for the sales team.
- Implemented Redux in filters for advanced data filtering, enabling scope even after user moved out of the component. Even used Redux for Search, pagination, Breadcrumbs and Conditional Rendering.
- Enabled users to upload and manage files, images associated with customer invoice .
- Implemented role-based permissions for five distinct user roles, allowing administrators to define and modify user permissions.
- Collaboration with the backend team to define API endpoints and API integration to facilitate secure and efficient data transfer between the CRM and external systems.
- Developed practices like creating reusable components.

### Landing pages associated with Admin Panel

- Collaborated closely with UI/UX and marketing team to understand digital marketing campaigns and design requirements.
- Implemented responsive web design using Tailwind CSS to ensure optimal user experiences across various devices and screen sizes.
- Web Analytics Tools: Used Hotjar for user behavior analysis, heatmaps, session recordings.
- Secured 100% search engine ranking by implementing SEO strategies.
