WORK EXPERIENCE

Front-End Developer, Bangalore

Cendrol | Mar 2023- Present

Uniting crucial tools for business expansion, the CRM Platform includes natively built marketing, sales, and customer service. CRM facilitates remarkable customer experiences at every growth stage. As a comprehensive customer platform, it seamlessly connects marketing, sales, content management, and customer service, empowering businesses to accelerate growth by prioritizing customer-centric strategies.

Roles and Responsibilities

- Developed and implemented a new front-end architecture using ReactJS, resulting in around a 40% percent increase in page load time and an 18% boost in user engagement.
- Designed and developed reusable components for future use, resulting in a reduction in development time for new projects.
- Identified and resolved performance and scalability issues in older projects, increasing performance and page load speed.
- Implemented Redux for efficient state management, simplifying code structure, and enhancing overall system performance.
- Applied expertise in utilizing RESTful web services for seamless integration between the Server Side and Client Side.
- Followed documentation to stay up-to-date on what needs to be updated in response to the new release version.

Associate Technical Engineer, Bengaluru

Kyndryl Solutions Pvt Ltd (IBM) | Aug 2020- Apr 2022

ServiceNow(SNOW) stands out as a robust and adaptable platform, providing an extensive array of solutions to effectively manage IT services, optimize business operations, and elevate customer experiences. At the core of ServiceNow lies IT Service Management (ITSM), a fundamental component dedicated to the efficient and effective delivery of IT services tailored to organizational requirements. ITSM incorporates diverse processes, tools, and policies, empowering businesses to adeptly oversee their IT infrastructure and deliver outstanding user support.

Roles and Responsibilities

- Worked in collaboration with seniors to improve the existing application ServiceNow(SNOW) ticketing tool.
- Improved the end-to-end experience of the ServiceNow(SNOW) ticketing tool by conducting usability reviews, identifying UI/UX issues, and proposing design recommendations.
- Designed and updated layouts of web pages using HTML, CSS, JavaScript, ReactJS, and Material-UI.
- Worked on React-HighCharts to display interactive graphs and charts on UI pages.

Front-End Developer (Intern), Nagpur

Vruksh Ecosystem Foundation | Nov 2019- May 2020

Worked as a Front-End intern with a main focus on technologies like JavaScript, HTML/CSS, and React. Delivered components for their MentorBuddy website under the supervision of senior developers.

Roles and Responsibilities

- Designed wireframes and prototypes for the web application using Invision Studio.
- Developed web application by translating UI/UX design wireframes into code, using JavaScript, ReactJs, CSS3, HTML5, and Bootstrap4.
- Executed the company's nonprofit initiative under the Government 'PM YUVA' scheme where I worked with other volunteers to increase general awareness of the students related to technical skills.
